1 Dashboard map
How the one-page layout reads

2 Headline KPIs
Five numbers with growth

3 Sales vs profit trend
Twelve months, two lines

4 Product categories
Where the $1.23M comes from

5 Sales by region
North, West, South, East, Central

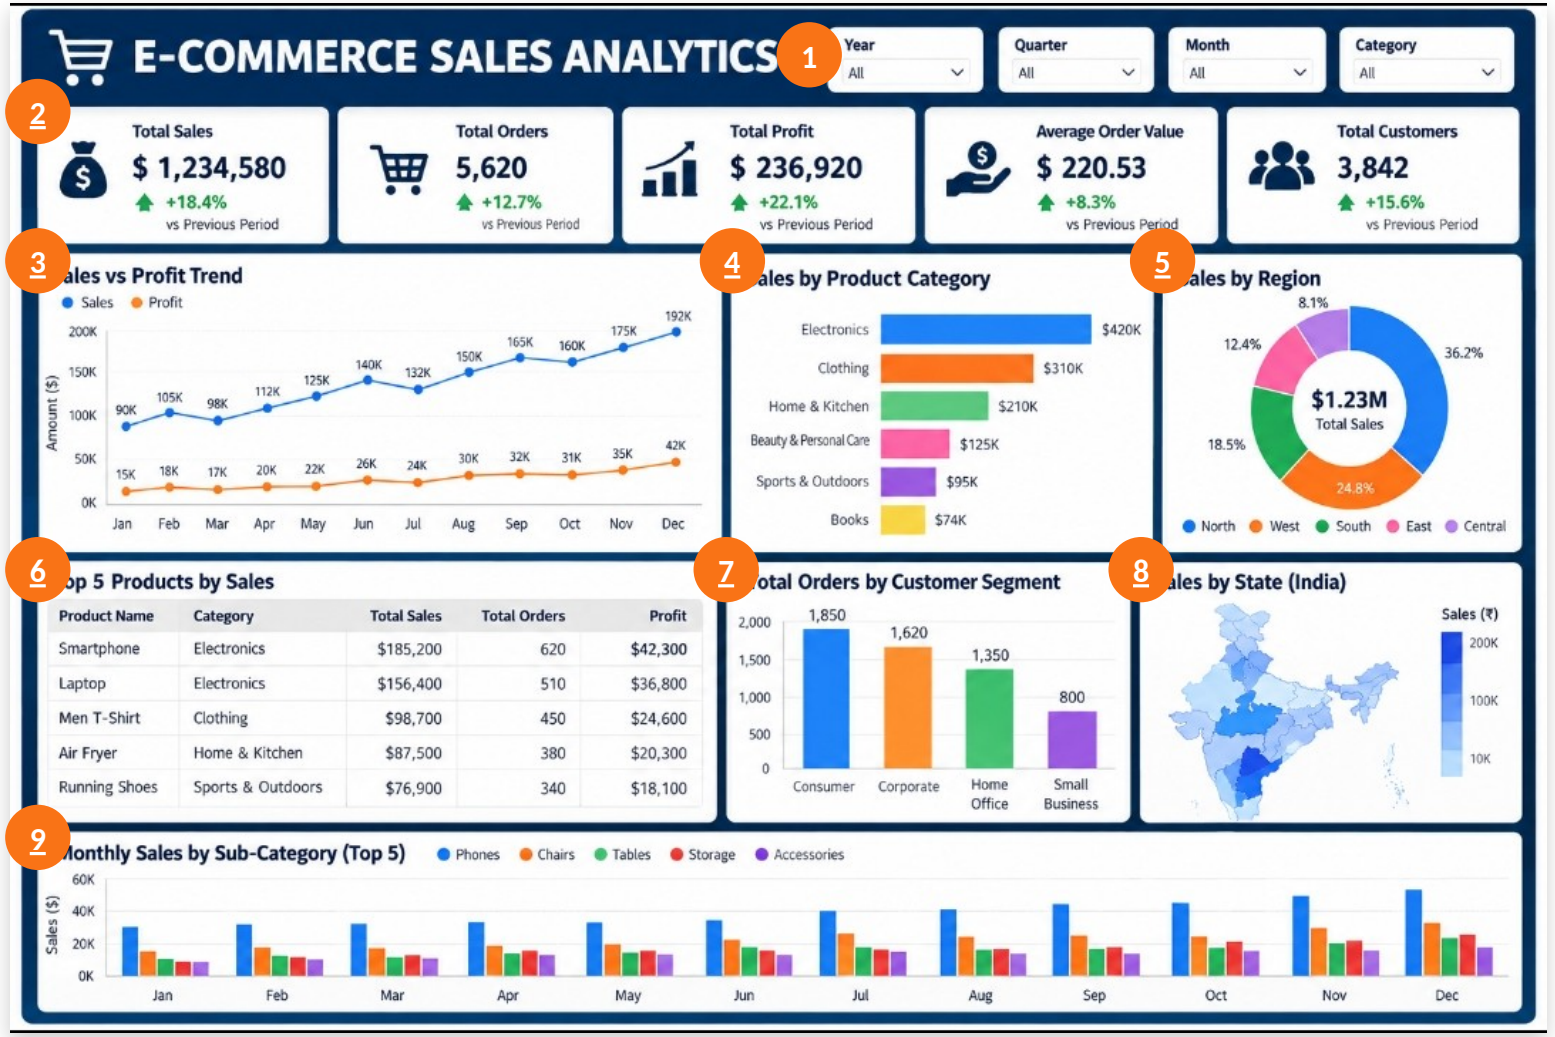

6 Top 5 products
The best sellers

7 Customer segments
Who places the orders

8 Sales by state
The India map

9 Sub-category sales
Monthly top 5 sub-categories

Anatomy of the one-page dashboard

1 **Filters** Year, Quarter, Month, Category

2 **KPI cards** five headline numbers

3 **Sales vs profit** monthly trend

4 **Product category** sales in $K

5 **Sales by region** donut, %

6 **Top 5 products** sales, orders, profit

7 **Customer segment** orders

8 **Sales by state** India map

9 **Sub-category** monthly top 5

Filters are all set to "All". Click badges 2–9 to jump to a topic.

Five KPIs, all growing versus the previous period

$1,234,580

Total Sales
▲ +18.4%
vs previous period

5,620

Total Orders
▲ +12.7%
vs previous period

$236,920

Total Profit
▲ +22.1%
vs previous period

$220.53

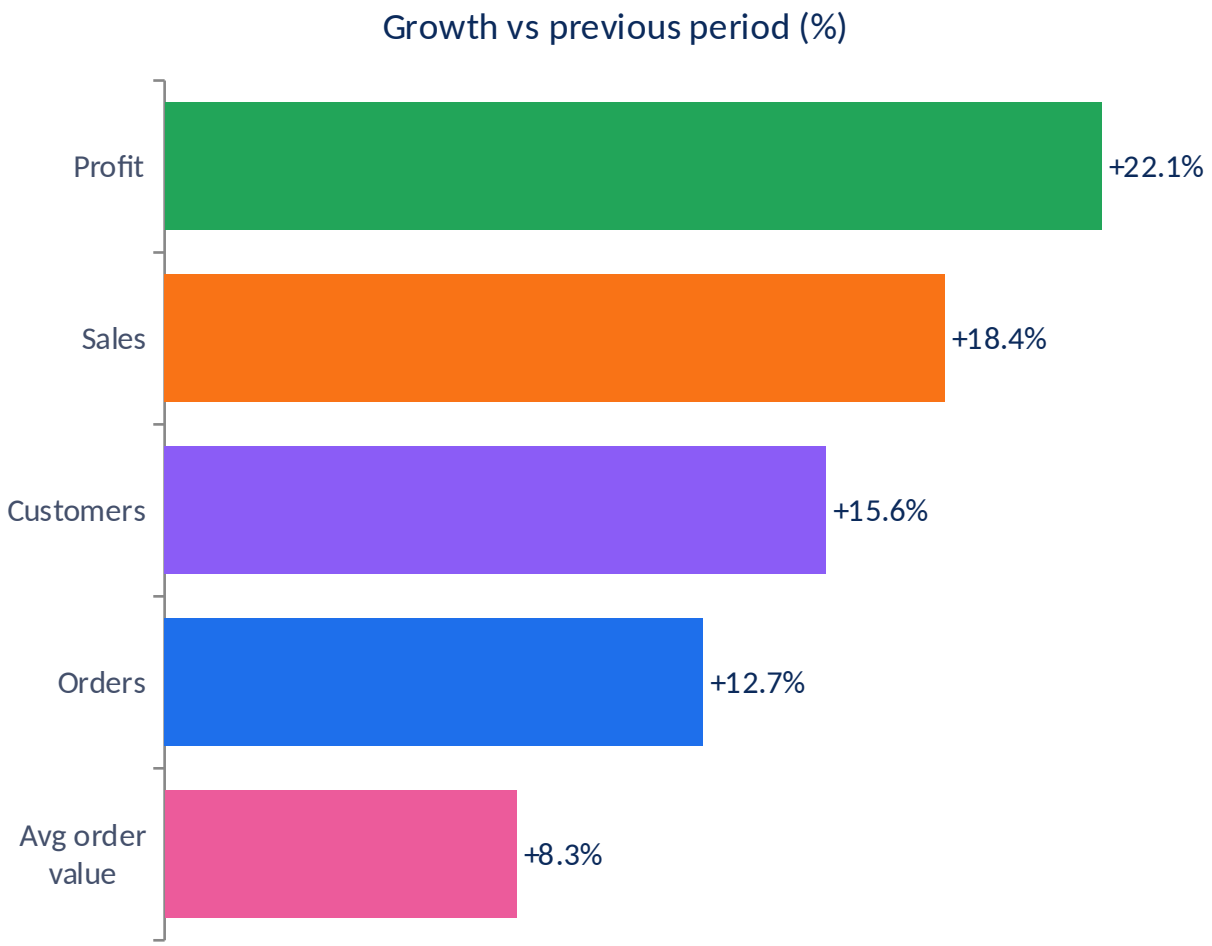

Average Order Value
▲ +8.3%
vs previous period

3,842

Total Customers
▲ +15.6%
vs previous period

Reading the arrows: each green ▲ is growth versus the previous period. The picture does not say which period (year, quarter or month), so check the filters before quoting these as year-on-year.

Profit is growing faster than sales

19.2%

Profit margin (derived)
$236,920 ÷ $1,234,580

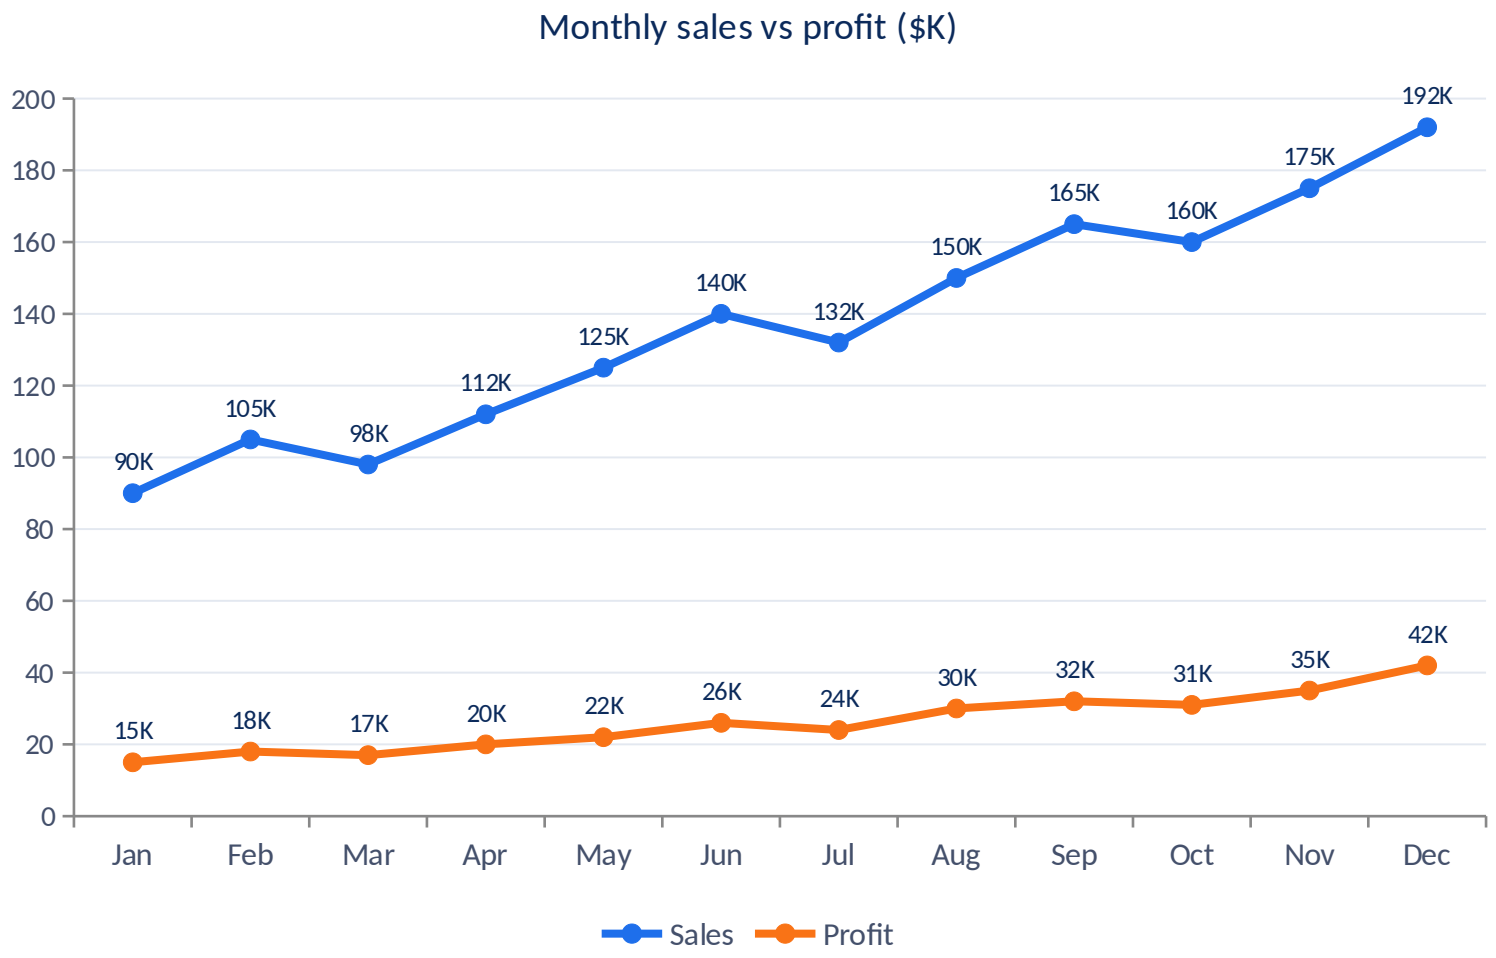

≈$321

Sales per customer (derived)
$1,234,580 ÷ 3,842 customers

1.46

Orders per customer (derived)
5,620 orders ÷ 3,842 customers

Sales and profit climb through the year

+113%

Sales, Jan → Dec
$90K to $192K

2.8×

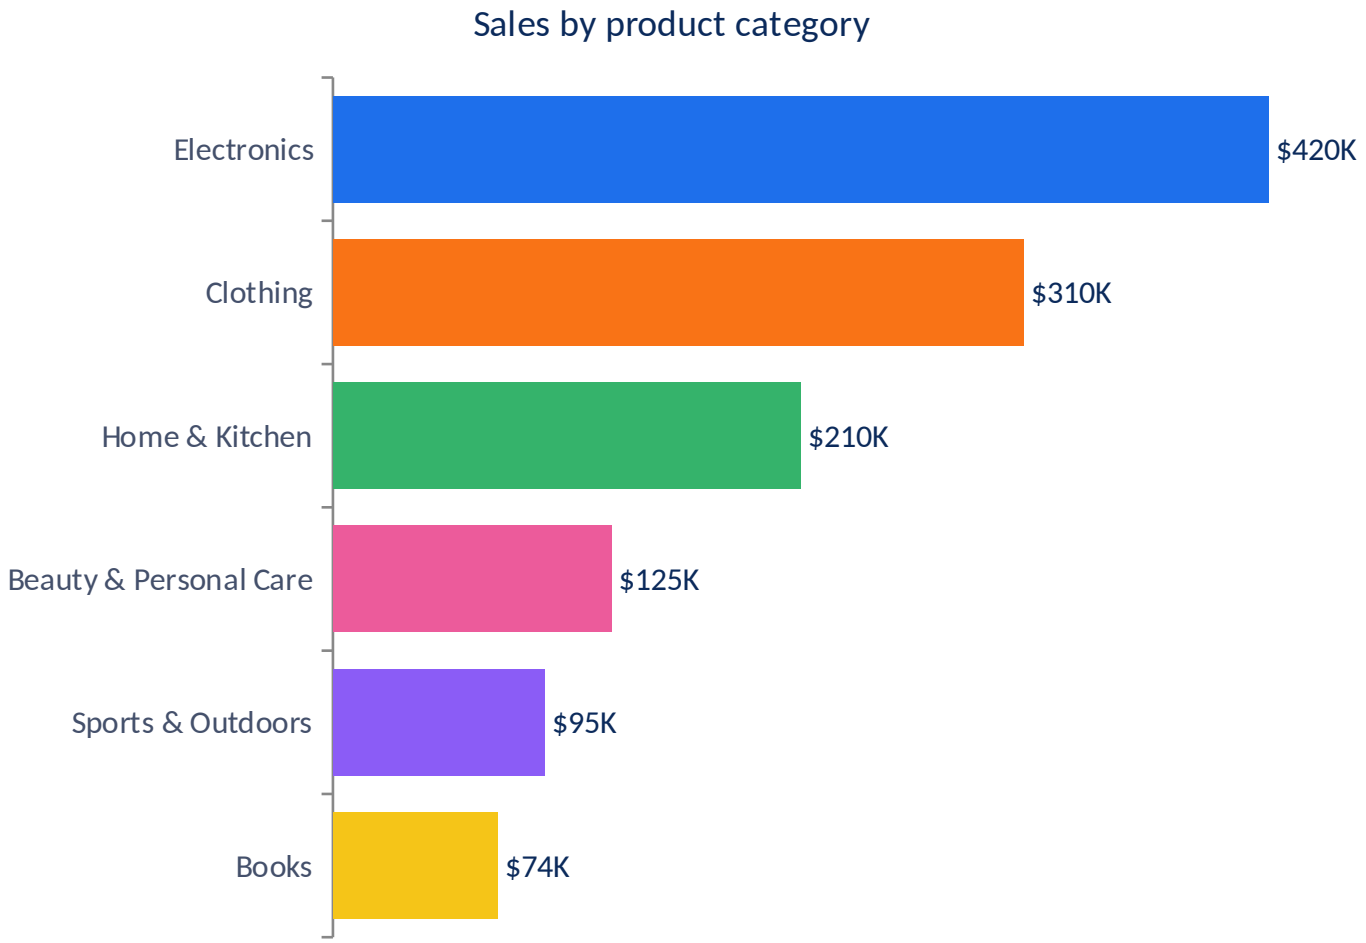

Profit, Jan → Dec
$15K to $42K

17% → 22%

Monthly margin (derived)
Jan 15÷90, Dec 42÷192

Sales and profit dip together in Mar, Jul and Oct.

Electronics and Clothing bring in 59% of sales

34%

Electronics share
$420K of $1.23M, the largest category

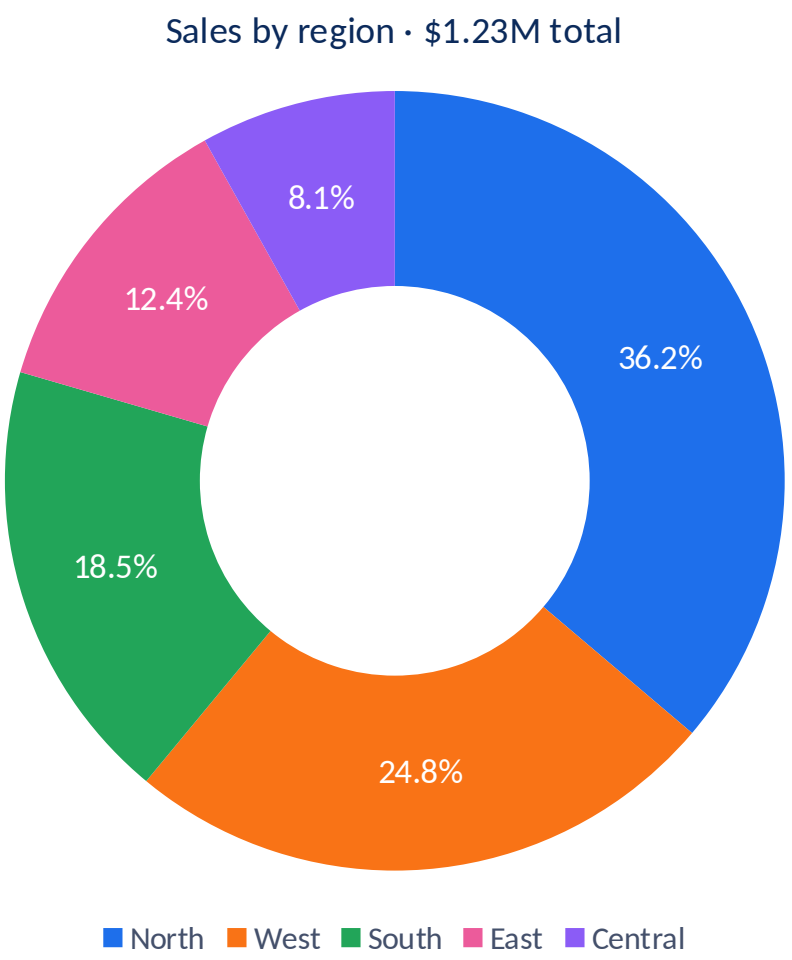

59%

Top two categories
Electronics + Clothing = $730K

6%

Books, the smallest
$74K, a possible growth gap

North and West generate 61% of sales

Region	Share	Est. sales*
North	36.2%	$447K
West	24.8%	$306K
South	18.5%	$228K
East	12.4%	$153K
Central	8.1%	$100K

*__Derived:__ share × total sales ($1,234,580), rounded; the dashboard prints only percentages. Shares add up to exactly 100%, and North alone (36.2%) is bigger than East and Central combined (20.5%).

Five products drive about half of sales and 60% of profit

Product	Category	Sales	Orders	Profit	Margin*	Sales/order*
Smartphone	Electronics	$185,200	620	**$42,300**	22.8%	$299
Laptop	Electronics	$156,400	510	**$36,800**	23.5%	$307
Men T-Shirt	Clothing	$98,700	450	**$24,600**	24.9%	$219
Air Fryer	Home & Kitchen	$87,500	380	**$20,300**	23.2%	$230
Running Shoes	Sports & Outdoors	$76,900	340	**$18,100**	23.5%	$226

**Derived: margin = profit ÷ sales; sales/order = sales ÷ orders. Every top-5 margin (22.8–24.9%) beats the overall 19.2%.*

49%

of total sales
$604,700 of $1,234,580

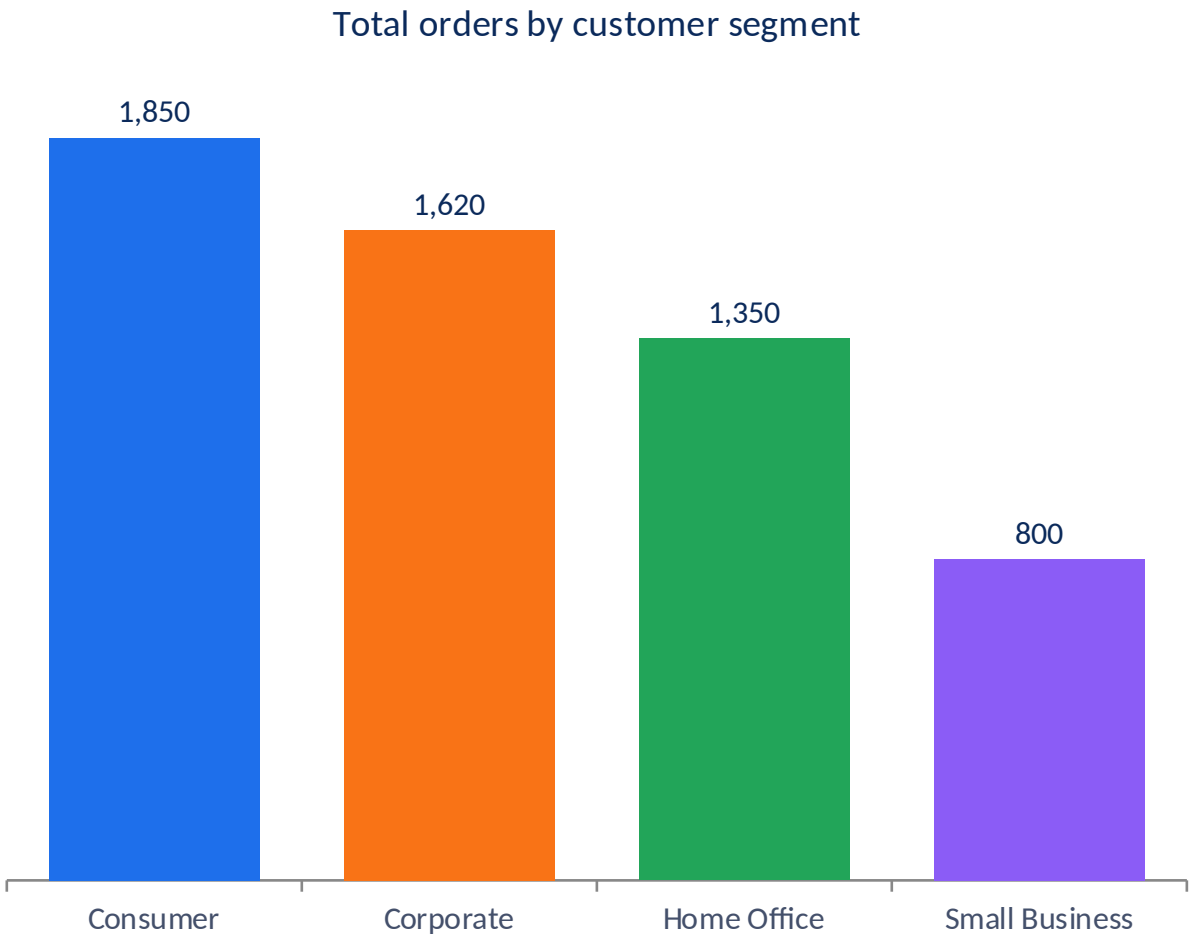

60%

of total profit
$142,100 of $236,920

41%

of total orders
2,300 of 5,620

Business buyers place two-thirds of all orders

32.9%

Consumer
1,850 orders

28.8%

Corporate
1,620 orders

24.0%

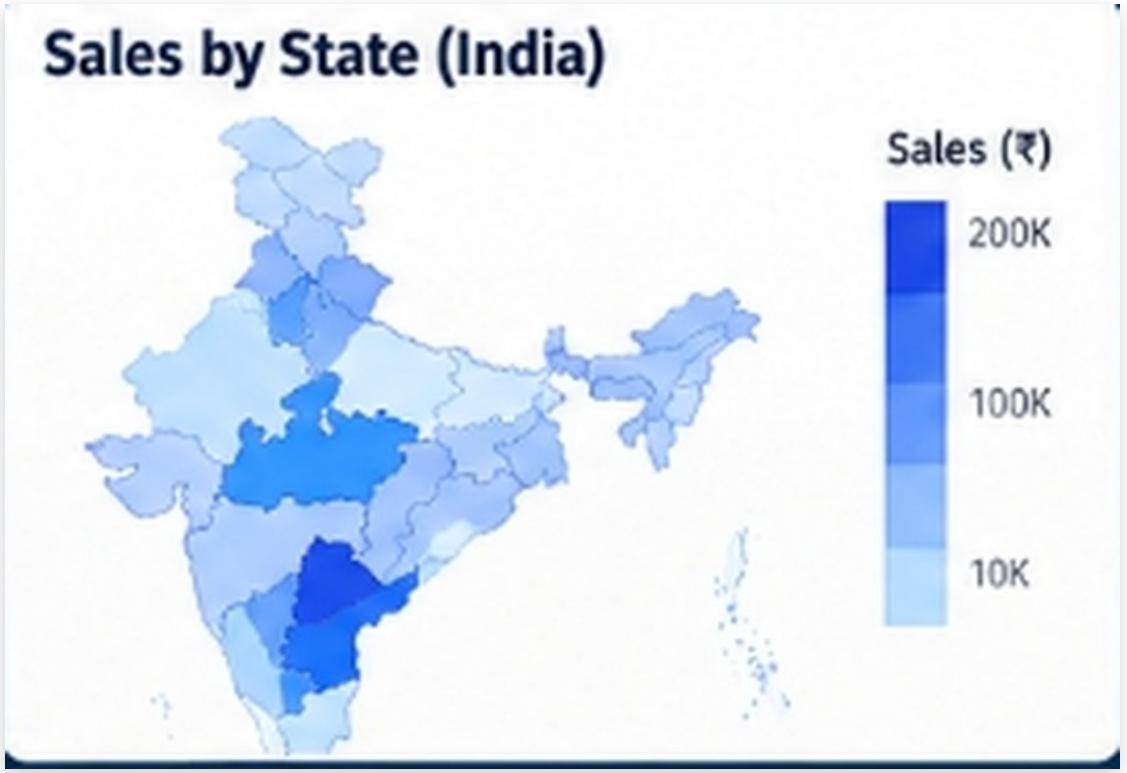

Home Office
1,350 orders

14.2%

Small Business
800 orders

Corporate + Home Office + Small Business = 67.1% of orders (3,770 of 5,620). Segments add up to 5,620, matching Total Orders.

Sales by state: where India buys

As shown in the dashboard

How to read it

Darker blue = higher sales. The legend runs from 10K to 200K (₹).

The darkest shading sits in central and southern states; the north and north-east are lighter.

No state names or exact values are printed, so rankings need the underlying data.

Check: the map legend uses ₹ while the KPIs use $, and North leads the region donut. Confirm currency and region definitions.

Monthly sales by sub-category: Phones lead all year

1 **Five sub-categories**
Phones, Chairs, Tables, Storage and Accessories, shown month by month from Jan to Dec.

2 **Phones on top**
Phones is the tallest bar every month, roughly 30K in January rising to the low-50Ks by December.

3 **Broadly upward**
All five series trend up through the year, matching the overall sales trend.

4 **Read as approximate**
Bars carry no data labels. Values here are visual estimates from the 0–60K axis.

Data checks: what reconciles and what does not

Check	What the picture shows	Result
Category sales	$420K+$310K+$210K+$125K+$95K+$74K = $1,234K	✔️ **matches Total Sales**
Segment orders	1,850+1,620+1,350+800 = 5,620	✔️ **matches Total Orders**
Region shares	36.2+24.8+18.5+12.4+8.1 = 100%	✔️ **adds up**
Monthly trend	Months sum to ≈$1.64M sales and ≈$312K profit	⚠️ **above KPI totals ($1.23M / $236.9K)**
Average order value	Sales ÷ Orders = $219.67; dashboard shows $220.53	⚠️ **small gap (0.4%)**
Currency	KPIs use $, map legend uses ₹	⚠️ **mixed symbols**
Map vs regions	Darkest states are central/south; North leads regions	⚠️ **check definitions**
Sub-category bars	Phones bars look larger in total than Electronics ($420K)	⚠️ **verify against source**

Three of eight checks pass cleanly. Verify the ⚠️ items against the source data before sharing externally.

What the dashboard tells us

34% of sales come from Electronics; Smartphone and Laptop lead.

49% / 60% of sales and profit come from just five products.

+22.1% profit growth beats +18.4% sales growth, so margins improve.

67% of orders come from Corporate, Home Office and Small Business buyers.

Worth exploring next

- Reconcile the monthly trend with the KPI totals
- Grow Small Business, the smallest segment (14.2%)
- Lift Books and Sports, the lowest categories
- Check orders per customer: customers +15.6%, orders +12.7%
- Reduce reliance on five products
